

LINDENWOOD

LINDENWOOD UNIVERSITY

ST. CHARLES, MISSOURI

Addendum to the 2013/2014 Undergraduate Catalog

Published August 2013

Combining Terms of Enrollment

In some cases, students can combine enrollments in two or more concurrent terms to attain the minimum enrollment for financial aid eligibility. Terms may be combined as follows:

- Fall Semester and/or Fall Quarter and/or Fall MBA I
- Fall Semester and/or Fall Quarter and/or Fall MBA II
- Spring Semester and/or Winter Quarter and/or Spring MBA I
- Spring Semester and/or Winter Quarter and/or Spring MBA II
- Summer Semester and Summer MBA

Note: Spring Quarter and Summer Quarter may not be combined with any other term.

Expectation of Student Work

Student work is defined as assignments, homework, and other academic activities to be completed outside of instructional time, including reading, studying, writing, research etc. Students should expect to spend a minimum of two hours per week completing this work for each credit hour enrolled (thus 6 hours of work outside of class for a 3-hour course), although the time spent outside of class may increase based on the topic and level of the course.

Catalog of Entry

Students are required to satisfy the degree requirements of the catalog in effect at the time of matriculation. A continuing student who desires to pursue a course of study added to the curriculum in a subsequent catalog year must submit a catalog change request to the office of Academic Services. If the request is granted, the student will be bound by all requirements in the new catalog. Students who discontinue study at Lindenwood University may be required to adopt the requirements of the catalog in effect at the time of readmission depending upon the length of the absence. See the Academic Policies and Procedures section of this catalog for further information.

MGMT 38900 Game Theory (3) This is an applied logic course dealing with strategic action. The term 'game' includes any situation in which people interact and adopt strategies in order to reach a certain desired outcome. We will discuss rationality, revealed preference, risk, zero-sum games, games of cooperation, bargaining, decision theory, Nash equilibria, Prisoner's Dilemmas, etc. Offered spring semester of even numbered years. Prerequisite: (MTH 12100, MTH 13100, MTH 13400, MTH 13500, MTH 14100, MTH 15100, MTH 15200, , MTH 24100, MTH 27100, or MTH 27200) and (ECON 23010, ECON 23020, or any three credit hours of philosophy (PHL 10200 or higher) or any three credit hours of political science (PS 15500 or higher)).

PSY 22000 Health Psychology (3) An investigation of the psychological influences on health, illness, and the physical, behavioral, and cognitive adaptation to illness. The mind-body relationship is examined through topics including exercise, stress, weight control, pain management, meditation, coping styles, psycho-immunology, and behavioral habits. Offered spring semester only. Prerequisites: PSY 10000.

REL 32600 Faith and Reason (3) (GE-Phl-Rel) This course examines the relationship between faith and reason in Western thought. Discussion will include topics like the following: the place of reason in religious discourse; scriptural reasoning; the relationship between faith, reason, and moral action; the contrast between reason and revelation as sources of knowledge; modern philosophy of religion; and the future of religious belief in a secular age. Offered intermittently. Prerequisite: ENG 17000 or HIS 10000 or three credit hours of philosophy (PHL 10200 or higher) or three credit hours of religion (REL 15000 or higher) or permission of dean.

SW 27000 Human Behavior in the Social Environment I (3) This course includes content on the reciprocal relationships between human behavior and social environments. Also considered are empirically based theories and knowledge that focus on the interactions between and among individuals, groups, societies, and economic systems; the range of social systems in which people live, individual, family, group, organizational, and community; and the ways social systems promote or deter people in maintaining or achieving health and well-being. Offered spring semester only. Prerequisites: SW 11000, PSY 10000, and BIO 10700.

SW 28000 Human Behavior in the Social Environment II (3) This course examines theories and knowledge of human biopsychosocial-cultural development including the range of social systems in which individuals live (families, groups, organizations, and communities) across the life span. Students address how systems promote or deter people from maintaining or achieving optimal health and wellbeing. Human development will be viewed as a complex interaction

between individuals and systems. Offered spring semester only.
Prerequisites: SW 27000.

Deleted SW 30500 Human Behavior in the Social Environment II

SW 31000 Social Work Practice I (4) This course examines the basic theory, knowledge and skills required to develop micro- (individual) professional relationships in generalist social work practice. Students will develop skills in defining issues, assessment, interviewing, crisis intervention, referral linkages, communication, and documentation. Initiation and termination of helping relationships with diverse at risk populations will be explored. **This practice course contains a lab component.** Offered fall semester only. Prerequisites: SW 11000, SW 28000 and full admission to the major.

SW 31100 Social Work Practice II (4) This course examines the basic theory, knowledge, and skills required to develop mezzo- (group, family) level generalist social work practice. Skill building for effective interventions with families and groups of varying racial, ethnic and other cultural groups in society, identifying values, and lifestyles that require divergent social work approaches and responses, and enhancement of professional identity as a facilitator of change for helping more than one client at a time will be addressed. **This practice course contains a lab component.** Offered fall semester only. Prerequisite: SW 31000.

SW 31200 Social Work Practice III (4) This course will examine the basic theory, knowledge and skills required to develop macro- (organization, community, society) level social work practice. Systematic use of the generalist perspective to evaluate and strengthen social programs and structures, identify issues of social stratification, assess community needs and resources, facilitate capacity building, promote self-advocacy and develop methods for overcoming resistance to change will be addressed. **This practice course contains a lab component.** Offered spring semester only. Prerequisite: SW 31100.
