

the New Wireless.

Isn't it grand? What? Why the new wireless of course. As you know I get so much mail that I am always around the post office and then too I just adore the new wireless. You know they say you can just put out the darkest(?) secrets on that little board and no one will ever find them out. It takes so many steps to write a note and instead of spending an hour or more to just put it there and not run around hunting for your friend "Grush" and it surely develops our splendid honor system because it is a great temptation to read some of those notes although we know that no one would even think of doing that.

Yes That was Gladys McKinleys bright idea and we all surely are grateful to her for our new wireless.
