

# Real Experience, Real Success with ArcGIS Online

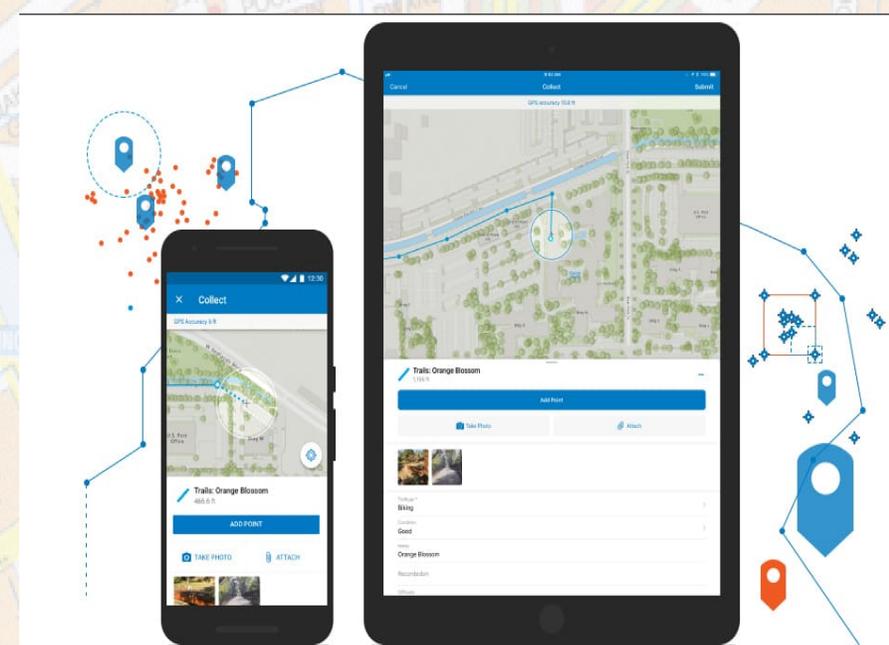

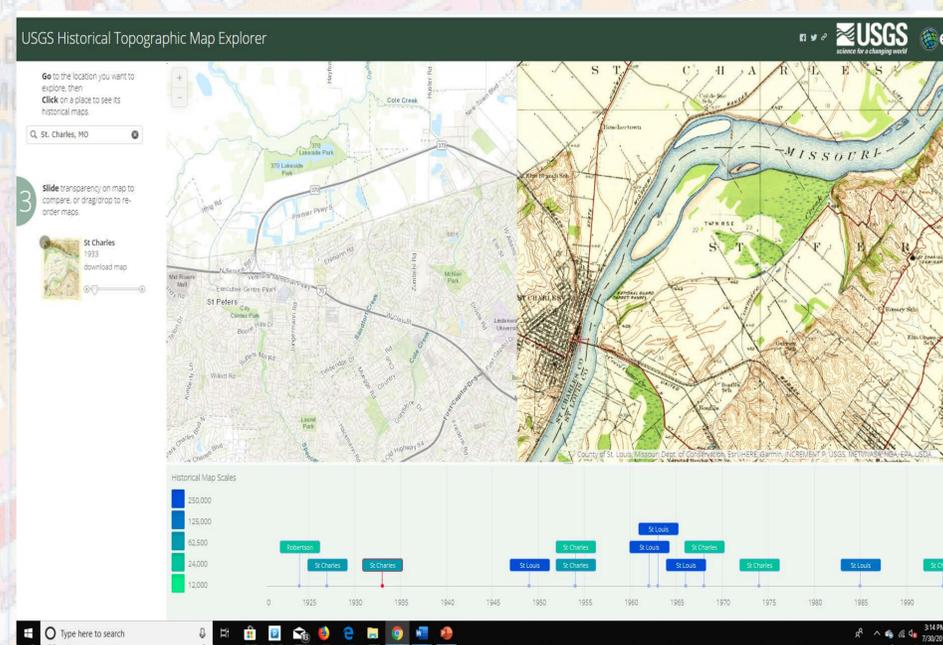

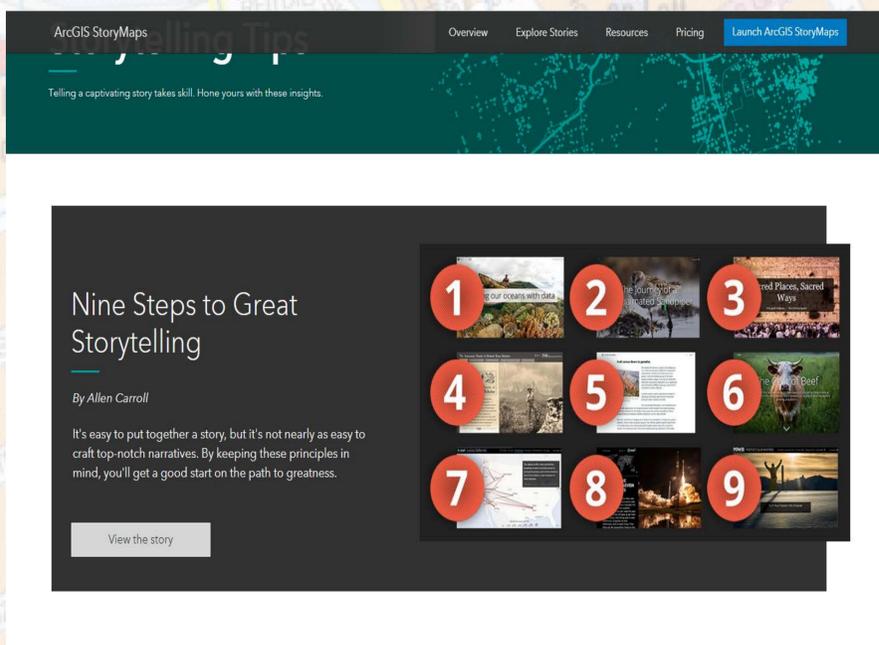

Are you looking for ways to engage your students while providing them with a highly competitive skill set?

Consider attending a session on ArcGIS online, a dynamic, easy-to-use software system that allows your students to engage with and analyze real data in the field and in the classroom. Separate sessions will explore each of the following functionalities:

## Getting to know Story Maps

## Getting to know the Living Atlas

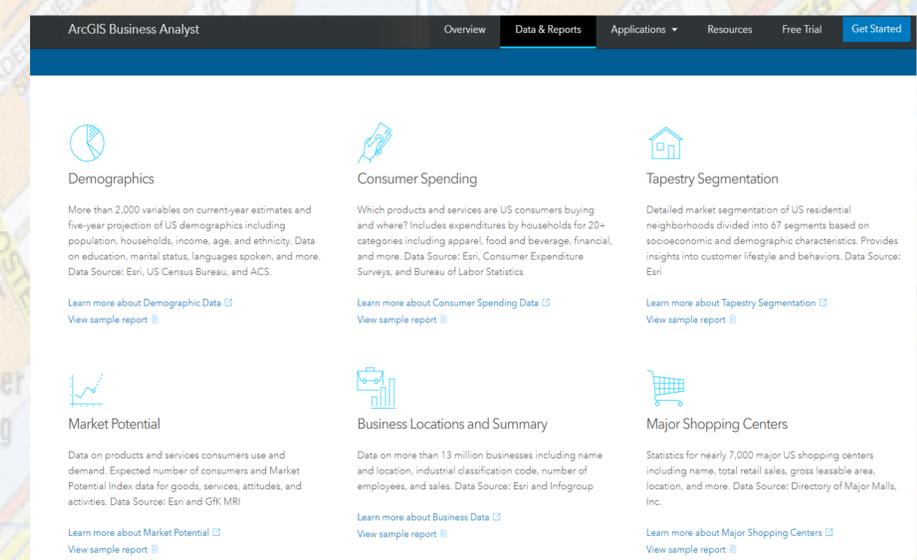

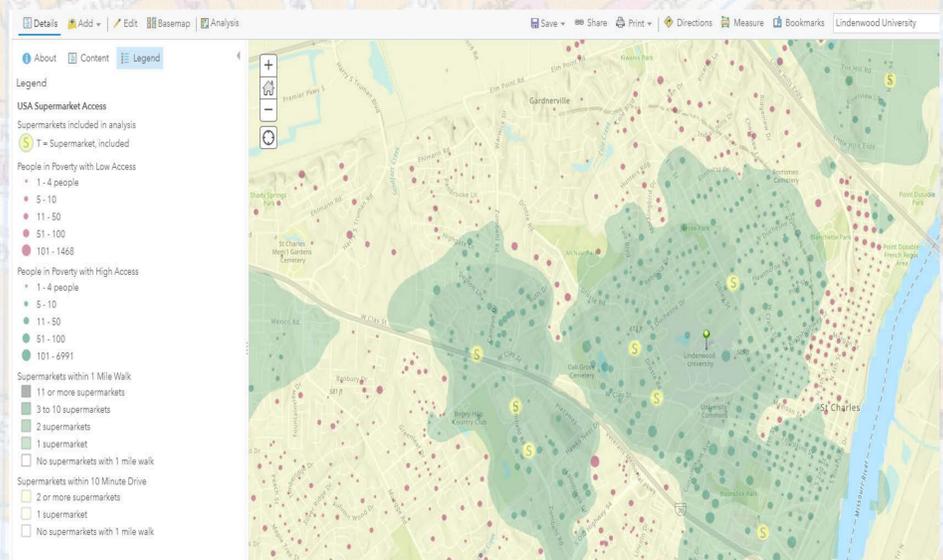

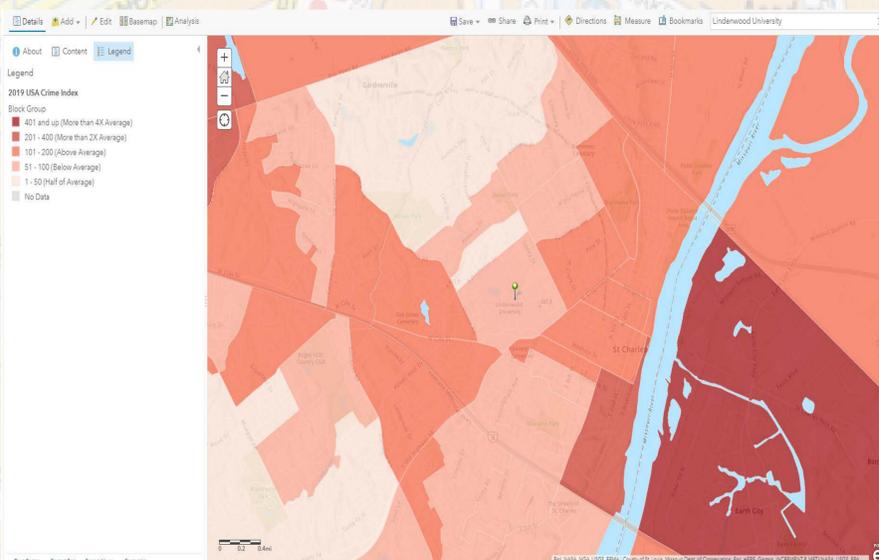

## Data Collection in the Field

## Crime Analysis and Crime Mapping

## Mapping Public Health Issues

## Business Analytics & Location Modeling
