

How to access Microsoft Teams

In order to access Teams, you'll first need to log in to Office 365 with your Lindenwood student email. After that, you will find yourself at this screen.

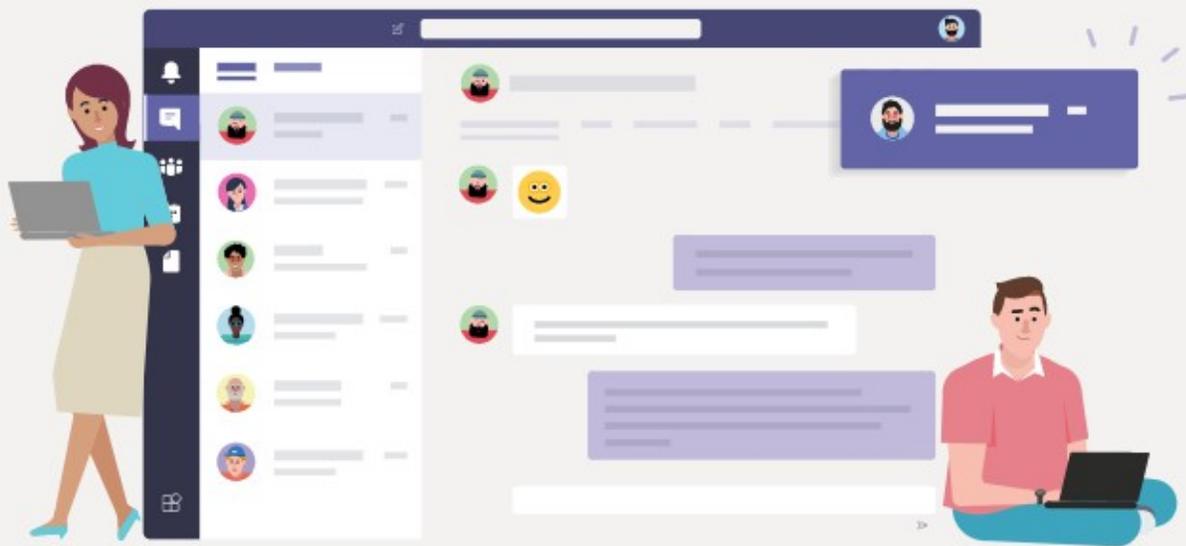

Office 365

To the left of your screen, you'll see a list of apps. Select the 'Teams' app, 3rd from the bottom.

You will be given the option to download the Teams app to your device, or to continue with the browser version of Teams.

Microsoft Teams

**Download the Teams desktop app
and stay better connected.**

[Get the Windows app](#)

[Use the web app instead](#)

Here, you'll be able to communicate with tutors and other students text, voice, or video calls. You can organize teams for group projects or share files.

You can also allow desktop notifications, so you never miss when one of your teammates is trying to reach out!
