

2020 - 2021 Technology Proficiency Staff Fellowship

Reached 75+ Lindenwood
University Faculty and Staff

Conducted 5 Training Events
(e.g., Tableau, Excel, SQL)

Hosted 5 PowerBI Cross-
Functional Working Group
Sessions

I had a really hard time wrapping myself around the pivot table exercise.
BUT I loved the content, and the presenters were patient and clear.

Excel Participant 2020

Querying Databases

Participants learned how to query a database, write SQL statements, and filter, select and join data tables.

Cleaning and Manipulating Data

Participants learned how to insert pivot tables to extract key findings and perform intermediate functions such as vlookup.

Data Visualization

Participants learned how to load data into visualization tools, prepare data for visualization, and demonstrate key findings in pie charts, tables, and graphs.

KEY FINDING

As data informed decision making becomes more important, it is necessary for faculty and staff to have time and support to further develop their data literacy.
